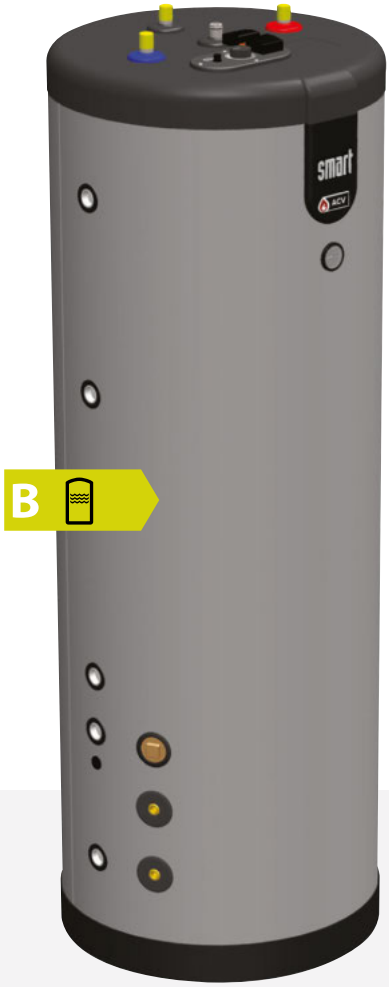
Smart ME 200

Stainless steel indirect cylinder with additional coil for use with multi-energy sources to produce domestic hot water.



- Ideal for use with renewable energy such as heat pumps, solar, heat recovery and in district heating schemes due to large primary store
- Reduces legionella risk due to temperature: hot water stored at > 60°C
- Low maintenance with no anode protection required
- The carbon steel coil enables this product to be used in a variety of installations including system separation for a heating circuit
- Long life – 25-year guarantee* on the corrosion resistant stainless steel cylinder
- Low standing losses – cylinder comes with thick polypropylene jacket
- Can provide dual temperature outputs for different circuits such as underfloor heating (low temperature) and DHW (high temperature)
- Suitable for unvented systems – supplied as a complete package including 3.5 bar mains unvented kit
- Maximise capacity of the cylinder with DHW mixing valve and 2 port valve supplied as standard
- Supplied with 3kW immersion heater (6kW option available)
- Fits through a standard doorway for access to plant room
- Cost effective solution, simple installation with no de-stratification kit needed and no flue requirements

Tank-in-tank technology
